

THE EZY FILE LOCATION MEMORY TOOL

Proudly designed by the wepinet.com Team to educate and empower the kids of the world

Here is a very cool and easy way for you to easily remember how to easily find the files on your computer -

First see your computer as a Big Building ...

- | | | |
|--------------------|-------------|--|
| 1. Computer On | see it as | <i>Finding The Big Building</i> |
| 2. My Computer | see it as | <i>Entering The Big Building</i> |
| 3. C - Drive | see it as a | <i>Floor Or Level</i> in that Building |
| 4. My Documents | see it as a | <i>Room</i> on that Floor |
| 5. Specific Folder | see it as a | <i>Filing Cabinet</i> in that Room |
| 6. Specific File | see it as a | <i>Draw</i> in that Filing Cabinet |

To easily find a specific file:

Turn Your **Computer ON**, click on **My Computer**, Click on **C-Drive**, click on **My Document**, click on **Specific Folder**, click on **Specific File** and **PRESTO!**

OR

Find the **Big Building**, Enter the **Big Building**, Take the Elevator to the "C" Floor, Find the **Right Room**, Select the **Specific Filing Cabinet**, Select the **Specific Draw** and **PRESTO!**

Now you will never ever forget how to locate a file on your computer again!
